Salesforce Developer

555 Windsor Street, Hartford, CT, Hartford, CT, US

Salary Range :   **0.00 To 75000.0000 (USD) Annually**

Worker Category :   **Full Time**

Job Class   **Support Departments**

CRT's Information Technology Department seeks a full-time, 35 hours/week, Salesforce Developer for our Hartford office.

Position Summary: Reporting to the Director of IT, provide technical support for Salesforce activities as well leading some of the project work. Understand and oversee the development and maintenance techniques surrounding SFDC. Develop, program, test, implement, document and update SalesForce.com software and system administration. Collaborate with IT, cross functional departments, and programs. Implement new enhancements including creation of custom objects, workflows, email alerts and templates. Build custom applications on the Force.com platform or other platforms as necessary. Leverage the Salesforce provided Application Programming Interface. Understand business requirements and create functional prototypes to address the business needs. Follow established Salesforce development standards and best practices. Create, manage, and document complex workflow rules, data validation, and system triggers. Maintain existing applications with an eye to continuous automation and improvement. Assist in troubleshooting difficult technical issues as needed. Participate in project team meetings and communicate effectively with business and technical team members. Create managed and unmanaged packages for application distribution. Maintain records and prepare reports. Support for various Agency programs as directed by Manager, User Services or Director of IT. Train end-users in tasks as directed by Manager, User Services or Director of IT. Perform all other duties as assigned.

Requirements: Bachelor's degree in Computer Science or related field. Three-five years of software development experience, ideally in a consulting environment. At least one year of experience developing on the Force.com platform. Proficiency in programming using Salesforce SFDC, Force.com. Strong experience with configuration, customization, programming with APEX APIs, APEX Triggers, and implementing new instances of SalesForce.com from scratch. Ability to gather and translate business requirements into well-architected solutions that best leverage the Salesforce.com platform. Strong technical design skills and an ability to deliver customer driven solutions. Deliver results on time and produce high quality deliverables. Proficient on programming best practices, design patterns and design trade-offs on internet and cloud based platform. Ability to design, code, test, debug, and maintain software applications. Strong attention to detail and excellent problem solving skills. Active Salesforce.com Developer Certification/s (Developer, Advanced Developer, Admin) also preferred.
